ALLEVYN[®] GENTLE
BORDER LITE
Foam Dressing

www.smith-nephew.com/allevyn

With multi-way stretch, unique multisite trilobe design and thin fit, **ALLEVYN[®] GENTLE BORDER LITE** Dressings are designed to optimize patient comfort.*^{1,4-10}

Features and benefits

ALLEVYN Range: Absorbent, protective and gentle

ALLEVYN Foam Dressings are absorbent, protective and gentle, doing the basics you expect from a dressing and more.

Absorbent^{7,11,12}
The hydrocellular foam core **innovatively balances absorption and retention** to create a moist wound healing environment^{5,13-16} with minimised risk of maceration.^{5,13-15}

Protective^{7,17}
The breathable, waterproof^{7,11,12} top film **provides a bacterial barrier**¹⁸ while the dressing remains intact.

Gentle^{5,14}
The gentle wound contact adhesives are **easy to apply and remove**,^{13,15,19,20} and are shown to **minimise pain and trauma** during dressing changes and skin inspection.^{5,13,21-23}

ALLEVYN GENTLE BORDER Foam Dressing

Multi-way stretch technology
• Helps with application on **awkward areas** and **areas of high patient movement**^{1,24}

Multi-site unique trilobe dressing
Unique, trilobe design conforms closely to difficult to dress body areas¹

Thinner fit
• **Half the thickness**[†] of ALLEVYN GENTLE BORDER dressings
• Improved **comfort and fit**^{1,4-10}

Cuttable^{‡22}
Can be cut,[‡] which can help dress awkward areas of the body, such as toes, elbows and fingers^{1,25}

*By conforming and minimising pain upon removal. †Of foam. ‡Cutting will compromise the bacterial barrier properties of the dressing.
