PRODUCT NAME:

COFLEX

PRODUCT NUMBER:

3000

PRODUCT CLASS:

Natural latex rubber based cohesive
flexible bandage with Polyolefin and
elastic backing.

COMMON NAME:

Cohesive flexible bandage.

INGREDIENTS:

CoFlex
contains the following
Ingredients:

- A. Polyolefin fibers and elastic yarns.
- B. Rubber based cohesive material containing a mixture of natural rubber, modified with tackifying resins and pigments.

COMMON DESCRIPTION:

CoFlex cohesive bandage is a combination of high strength Polyolefin fibers, elastic yarns and cohesive rubber compound. The cohesive material contains tackifying resins and color pigments. It does not contain any volatile materials.

HANDLING INFORMATION:

CoFlex contains Polyolefin, elastic yarns, natural rubber and hydrocarbon resins. This product could be combustible if exposed to a source of sparks or flames; therefore, care should be exercised in this regard.

WASTE DISPOSAL:

CoFlex should not be considered hazardous waste for the purpose of state and federal regulations.
